

Fixed Points and Topological Degree in Nonlinear Analysis (5th)

Filesize: 3.39 MB

Reviews

Very helpful to all of class of folks. This is certainly for all who statte there had not been a worthy of studying. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Jayda Lehner Jr.)

FIXED POINTS AND TOPOLOGICAL DEGREE IN NONLINEAR ANALYSIS (5TH)

[DOWNLOAD](#)

American Mathematical Society. Paperback. Book Condition: new. BRAND NEW, Fixed Points and Topological Degree in Nonlinear Analysis (5th), Jane Cronin, The topological methods based on fixed-point theory and on local topological degree which have been developed by Leray, Schauder, Nirenberg, Cesari and others for the study of nonlinear differential equations are here described in detail, beginning with elementary considerations. The reader is not assumed to have any knowledge of topology beyond the theory of point sets in Euclidean n -space which ordinarily forms part of a course in advanced calculus. The methods are first developed for Euclidean n -space and applied to the study of existence and stability of periodic and almost-periodic solutions of systems of ordinary differential equations, both quasi-linear and with 'large' nonlinearities. Then, after being extended to infinite-dimensional 'function-spaces', these methods are applied to integral equations, partial differential equations and further problems concerning periodic solutions of ordinary differential equations.
