

## Mathematical Questions and Solutions in Continuation of the Mathematical Columns of the Educational Times. Volume 39 (Paperback)

Filesize: 9.17 MB

### ***Reviews***

*Undoubtedly, this is the best job by any article writer. This really is for all those who statte that there was not a worth reading. I am very easily can get a enjoyment of reading a published pdf.*

***(Rowena Leannon)***

## MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES. VOLUME 39 (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 Excerpt: .A, B are two points in the plane of a given circle; give a geometrical construction for finding the position of a point P on the circumference, such that the lines AP, BP make equal angles with the tangent at P. Solution by Dr. Curtis; E. Ruttek; and others. This, which is known as Alhazen's problem, admits of the following geometrical solution: --If C be the centre of the circle and a its radius, take E and F so that AC. CE = a = BC. CF; draw the hyperbola-locus of vertex of all triangles whose common base is EF, and the difference of whose base angles =  $\angle CEF - \angle CFE$ ; let H be any one of the four points in which this hyperbola cuts the circle; then, as  $\angle EFH - \angle FEH = \angle CEF - \angle CFE$ , we have  $\angle CEH = \angle CFH$ , and in the triangles AC H, HCE, we have AC: CH = CE: CH; therefore  $\angle AHC = \angle CEH$ ; similarly  $\angle BHC = \angle CFH$ , and therefore  $\angle AHC = \angle BHC$ , and  $\angle AHK = \angle BHK$ , therefore H is one of the required points. 6924. (By Professor Seitz, M.A.)--A triangle is formed by joining three random points within a sphere; prove that the average area (1) of the triangle is  $\frac{1}{2} \pi r^2$ , and (2) of its inscribed circle is  $(\frac{1}{2} \pi r^2 - \log 2) r^2$ . 6917. (By J. L. McKenzie, B.A.)--A straight line XY cuts the tangents at two given points A and B on a given circle in L and M respec...
