Excerpt: .from 1837 to 18(39 inclusive, of the four great earth-thermometers sunk into the rock of the Gallon Hill, at the Royal Observatory, Edinburgh, by the late Principal Forbes, pursuant to a vote by the British Association for the Advancement of Science. Leaving on one side the several natural-philosophy data which have been investigated from smaller portions of the same series of observations VOL. XVIII. 2 B both by Principal Forbes and Sir William Thomson, the author applies himself solely to trace the existence of other cycles than the ordinary annual one, in the rise and fall of the different thermometers. Of such cycles, and of more than one year s duration, he considers that he has discovered three; and of these the most marked has a period of 11 1 years, or practically the same as Schwabe s numbers for new groups of solar spots....
