It is easier to apply the principle of mechanism to material things than to organisms. For material things have no principle of self-action, they move only as they are moved. The postulate of physical science is that it. is inert, and that all bodies continue in the state in which they are, unless they are changed by external force. If this be so, it is evident that the principle of mechanical explanation has not the difficulty to meet, nor the resistance to the acceptance of it, which occurs on the supposition that the body can...
