A good selection of these plants may be made by applying to some of the great cultivators, as Messrs. Henderson and Co., and others. The following plan, mentioned in the Floricultural Magazine/ seems a simple and efficient method of cultivating Pelargoniums. After they have flowered, which is generally by the middle of August, they should be cut down rather close, they will then put out fresh shoots; when these are about a quarter of an inch long, take them out of the pots, remove the earth from the roots, thin the main roots, and shorten the others, so as to make them small enough for small-sized pots; plant them in these with fresh earth, and put them into a cool frame or pit, shutting them up close till they are well established; then expose them to the air to harden, and take them...
