

## The flavin-containing monooxygenase enzyme system

By Tímea Borbás

LAP Lambert Acad. Publ. Okt 2009, 2009. Taschenbuch. Book Condition: Neu. 222x151x17 mm. Neuware - In the early phase of preclinical drug development it is important to conduct in vitro/in vivo experiments on the metabolism of new chemical entities in order to predict bioavailability and to clarify metabolic profiles and pathways. This work is fundamental because drug metabolism influences drug efficiency and safety. The flavin-containing monooxygenases (FMOs) is one of the major classes of microsomal monooxygenases responsible for the metabolism of nucleophilic heteratom-containing drugs. This book provides a summary of recent scientific results regarding FMO and provides information about its biochemical, structural and catalytical properties; isoforms; substrate specificity; physiological significance and toxicological importance; relevance in drug metabolism/development; and regulation. The issues discussed in this book should be especially useful for students of the Faculty of Pharmacy and Medicine in order to gain a wider perspective of the field of drug metabolism and for professionals working in the field of Absorption, Distribution, Metabolism, Excretion, and Toxicity (ADMET) science. 84 pp. Englisch.

### Reviews

*Undoubtedly, this is actually the best operate by any publisher. It is among the most amazing pdf i have got read. Its been printed in an exceptionally straightforward way which is just after i finished reading this book in which actually altered me, change the way i believe.*

-- **Deonte Kohler PhD**

*This pdf may be worth acquiring. It can be writter in easy words and phrases and not hard to understand. I am pleased to tell you that this is basically the finest book i have read through during my personal existence and might be he greatest pdf for at any time.*

-- **Jeffry Tromp**
