

Mathematical Questions and Solutions, from the Educational Times. Volume 18 (Paperback)

Filesize: 2.12 MB

Reviews

This is an incredible ebook which i actually have ever go through. This can be for those who statte that there had not been a really worth reading. I am just quickly can get a delight of reading a published book.

(Ms. Colleen Ziemann V)

MATHEMATICAL QUESTIONS AND SOLUTIONS, FROM THE EDUCATIONAL TIMES. VOLUME 18 (PAPERBACK)

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1873 edition. Excerpt: .is fired at random from a gun, with a given velocity; find the average of its range. Solution by the Proposer. If θ be the elevation of the gun, and h the height due to the velocity, the range is $1/h \sin \theta$. The number of presentations of the gun at an elevation θ is proportional to $\cos \theta$, supposing every elevation to be equally probable; hence the mean range is 3817. (Proposed by M. Collins, B.A.)--A body will describe a circle by a force $= v^2/r$ directed towards its centre. Hence prove that if a circle be drawn round any other interior point C as centre of attraction, the force of attraction towards C must vary as PC^3 --(the cube of the distance of P from the pole of C); P being any position of the point moving in the circumference; and show that this last property is true for all conic sections. Solution by J. J. Walker, M.A. 1. Let CT be the perpendicular on the tangent at P , and O the centre of the circle. If F be the force along PC , its component along PO must be CT/CP equal to CO/CP ; that is, $FC \cdot CP = CO^2$, or $FC = CO^2/CP$. But in the circle CT is to the perpendicular from P on the polar of C as CO to radius; therefore, $c = 2$. Let K be the centre of a conic, and KL , KM the semi-diameters conjugate to the directions...
